

MESH-INJURED WOMEN SUPPORT GROUP

Facilitated Support Group for Mesh Injured Women

The WA Pelvic Mesh Support Group (WAPMSG) is a Facebook Group developed by Australian women who have had mesh implant surgery to treat stress urinary incontinence and/or pelvic organ prolapse. For these women, the complications of their treatment are serious and life-changing. Ongoing anxiety, trauma, managing persistent pelvic pain and the many impacts on daily life are just some of the challenges these women face. This group has been convened to provide a safe space for women to share their experiences and strategies for survival.

For further details please join the WA Pelvic Mesh Support Group on Facebook: <https://www.facebook.com/groups/322866511489902/> or contact us by email at WAmesh@bigpond.com
